WORK EXPERIENCE

Infollective Solution Company (Kuching, Sarawak)

Apr 2021 – Present

Software Developer

- Collaborated closely with the frontend development team to integrate the HTML, CSS, Bootstrap, JavaScript, and jQuery components seamlessly into the overall application design.
- Developed and implemented backend infrastructure using PHP and utilized Yii2 framework to accelerate backend development and enhance code maintainability.
- Integrated MySQL database with Yii2 framework to handle data storage and retrieval effectively.
- Implemented security measures in the backend code to protect against vulnerabilities and unauthorized access.
- Documented the backend codebases and provided technical documentation for future reference and knowledge sharing using SwaggerUI.
- Conducted thorough testing and debugging of both frontend and backend components to ensure the overall application's reliability and functionality.

Infollective Solution Company (Kuching, Sarawak)

Aug 2020 – Mar 2021

Full-Stack Web Developer – Internship

- Developed, maintained, and shipped production code for client website primarily using HTML, CSS, JavaScript, jQuery and PHP.
- Conducted quality assurance testing across multiple web browsers and devices to ensure seamless cross-browser compatibility and optimal mobile responsiveness.
- Implemented robust and secure APIs and web services using PHP to facilitate seamless communication between frontend and backend systems.
- Integrated MySQL database with PHP to store and retrieve data efficiently.
